PROFESSIONAL SUMMARY

Computer Engineering graduate with strong troubleshooting, analytical, and problem-solving abilities. Fast learner eager to apply technical skills and grow in software, systems, or technology-focused roles.

EDUCATION

Bachelor of Science in Computer Engineering

Received December 2025

Florida International University, Miami, FL

Honors: Dean's List

Associates in Arts: Computer Engineering

Received July 2023

Miami Dade College, Miami, FL

Honors: Dean's List

PROJECTS

Capstone Project: "Multi-Sensored Surveillance Bot"

December 2025

Florida International University

- Collaborated in a 5-person team to design, build, and program an autonomous robot using HiWonder's Puppypi and integrated it with LiDAR and Sensors to detect Radiation and Fire.
- Developed the project's navigation system. Took the LiDAR mapping and gave the bot the means to move around and avoid obstacles.

Python Project: "IoT Data Generator"

July 2025

Florida International University

- Built a Python desktop application that randomly generates synthetic IoT sensor datasets and provides statistical analysis + visualizations.
- Generated 1,000 users $\times$ 1,000 sensor records each with export to CSV/JSON and interactive plots.
- Implemented a GUI, descriptive statistics, and histograms/line plots using matplotlib.

SolidWorks Project: "Bench Vise Assembly"

July 2023

Miami Dade College

- Created a multi-component bench vise assembly in SolidWorks using individual part and assembly files.
- Modeled and assembled components including the vise base, jaw, screw/handle components, plates, and fasteners.
- Produced an exploded-view animation to show component relationships and overall assembly structure.

SKILLS

- Programming: Python, C, Java
- Data & Analysis: Data generation, statistical analysis, data visualization (matplotlib)
- Systems: Embedded systems, sensor integration, digital logic, basic networking
- Tools: SolidWorks, Microsoft Office, Google Workspace, Anaconda, IntelliJ, Jupyter Notebook
- Platforms: Windows, macOS, Linux

LEADERSHIP & VOLUNTEERING

Volunteer

July 2025

GoFundMe Relief Campaign - Late 2024

- Co-organized and spearheaded a fundraising campaign to provide financial relief and essential items for a family displaced by an apartment fire.
- Result: Raised over \$1,000 within the first five days and secured donations of clothing and essentials to deliver immediate support.
